### **Transport Dimensions**

Maximum track width.

Minimum track width.

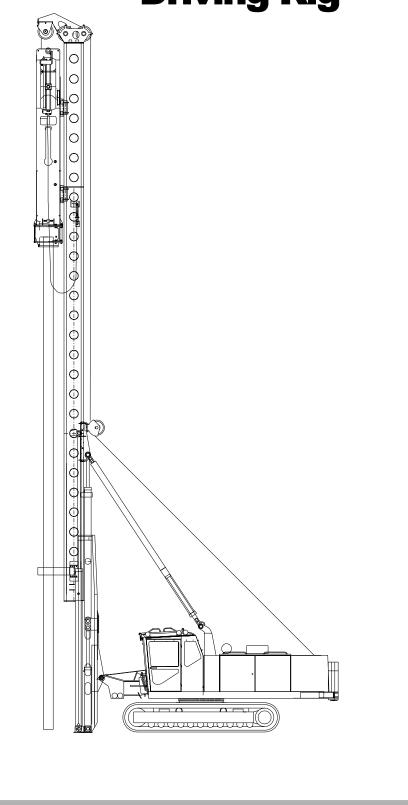

PM 20 + HHK-5A hammer transport dimensions with the standard leader length.

### **DATA SHEET**

# PM 20 Hydraulic Pile Driving Rig

### **JUNTTAN PM 20**

Junttan has a comprehensive range of hydraulic multipurpose piling rigs. Many ingenious details of the Junttan rig provide ease of transport, excellent stability, quick and safe pile handling, precise inclinations and top pile driving performance. Junttan PM 20 is the basic model of the range, and can be adapted to for driven, bored or vibrated piles simply by changing the tool equipment. This brochure presents PM 20 rig equipped for driven piling.

### **Design Benefits of Junttan Rigs**

self erecting leader - leader horizontal movement

expandable tracks - powerful winches

low centre of gravity - hydraulic system adaptable to different equipment

low transportation height e.g. hammers and rotary drives

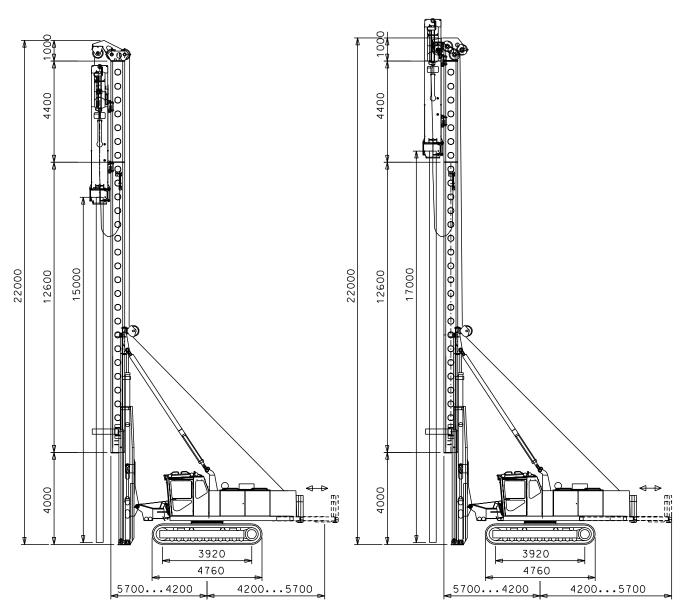

| Base Machine Junttan PM 20   |                          |
|--|--------------------------|
| Leader (telescopic leader, self-erection)                          |                          |
| Length   |                          |
| <ul> <li>fixed leader (12,6+4,4 m)</li> </ul>                      | 17 m                     |
| <ul> <li>telescopic movement</li> </ul>                            | 4 m                      |
| <ul> <li>effective length</li> </ul>                               | 21 m                     |
| <ul> <li>with extra 2m extension (optional, see page 3)</li> </ul> | 23 m                     |
| - cathead height   | 1 m                      |
| Vertical movement up   | 1000 mm                  |
| down   | 500 mm                   |
| Horizontal movement max  | 1500 mm                  |
| Hydraulic pile arms on leader                                      |                          |
| Electronic leader inclination meter                                |                          |
| Max. load on the leader (pile + hammer) and                        |                          |
| inclinations according to a separate capacity table                |                          |
| Winches (single line pull, 1. layer)                               |                          |
| Main winch (hammer)  | 10 ton                   |
| Aux. winch (pile)  | 8 ton                    |
| Aux. winch II (optional, see page 3)                               | 5 ton                    |
| Engine   |                          |
| Cummins QSB5.9   | 179 kW                   |
| Fuel tank  | 600 litres               |
| Hydraulics   |                          |
| Oil flow max   | 2 x 160 l/min + 86 l/min |
| Pressure max   | 300 bar                  |
| Undercarriage (hydraulic extension)                                |                          |
| Transport width  | 3100 mm                  |
| Working width  | 4100 mm                  |
| Crawler length   | 4760 mm                  |
| Width of track shoes   | 800 mm                   |
| Counterweight  |                          |
| - 6000 kg  |                          |
| - hydraulically movable 1,5 m                                      |                          |
| Weight   | 46000 kg                 |
| Excluding: hammer and any optional equipment                       |                          |
|  |                          |

### **Hydraulic Hammers for PM 20 (examples)**

(for more information please see Junttan hammer catalogue)

| Models                                | HHK-5  | HHK-5AL | HHK-5A |
|---------------------------------------|--------|---------|--------|
| Max. energy (kNm)                     | 60     | 60      | 60     |
| Max. stroke (m)                       | 1,2    | 1,2     | 1,2    |
| Blows per minute, adjustable          | 30-100 | 40-100  | 40-100 |
| Ram weight (kg)                       | 5000   | 5000    | 5000   |
| Total weight (kg) including drive cap | 7400   | 7900    | 8700   |

| Examples of optional equipment for PM 20 (optional equipment increase the total weight) |                   |  |
|---|-------------------|--|
| Stabilizers (rear legs)   |                   |  |
| Leader extra extension piece  | 2 m               |  |
| Additional winch (Aux. winch II)  | 5 ton             |  |
| Pre-drill guides and JD3 side auger   | torque 3 t/m      |  |
| Side cathead  |                   |  |
| Flat track shoes  |                   |  |
| Tipping cabin   | tipping angle 15° |  |
| Air conditioning for cabin  | 5                 |  |
| Energy measuring device for hammer  |                   |  |
|   |                   |  |

PM 20 + HHK-5A hammer with a standard cathead. (Working weight about 54700 kg)

PM 20 + HHK-5A hammer with a side cathead. (Working weight about 55200 kg)
